

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. PREFACE

Early in 1910, the Regents of the University voted to place the compilation of this Directory into the hands of Registrar W. D. Hiestand. Accordingly, work was begun under his directions in April, 1910. It was found that no reliable record of any kind had been kept of the alumni since the issuance of the Directory of 1906. It was also found that since the publication of the last Directory the number of degrees granted had risen from 6627 to 9814. In other words, were the same plan to be adopted as that followed in the Directory of 1906, by which every person listed was invited to send in a record of his civic, military, political and professional career, a volume of larger proportions must be published than that for which funds were available.

These conditions led Mr. Hiestand to settle upon two points of policy: an entirely new start must be made, with the Directory of 1906 as an entirely antiquated and inaccurate guide; and the information inserted after each name must be limited to the collegiate degrees obtained and to the present address and occupation.

An infinite amount of correspondence had to be entered into. In many cases a second, third and fourth letter became necessary because the graduate addressed neglected to reply. In other cases, every trace of the person sought for had been lost and laborious correspondence with the classmates or friends of the missing alumnus had to be undertaken, often with disappointing results.

Added to this was the fact that the congestion of routine work in the Registrar's office often became such that the assistant who was assigned the task of compiling the information, had to interrupt her work on the Directory frequently, and at times drop it altogether. A further aggravating circumstance was the fact that when the information was finally

ready for the printer, the Democrat Company was congested with work for the legislature of 1911, then in session.

Meanwhile the Alumni Executive Committee petitioned the regents for the appointment of an Alumni Recorder who might push the work to its completion and who might keep a record of all changes of occupation and address of graduates at his office, so that his card index file, at least, might contain an accurate and authentic record of every alumnus. In October, 1911, the Alumni Recorder assumed his duties. Since that time the work has proceeded regularly, and every effort has been made to render the information up to date and accurate. It must be remembered, however, that in a body of over 8000, changes of address occur daily, and that even with the utmost care absolute accuracy is impossible. Even as these pages are written, there are several dozen changes of address at hand which have reached the Recorder too late for publication. These changes as well as such as shall reach the Recorder's office in the future will be indicated on the card index file which has been installed, and every effort will be made to keep the file reliable.

It is to be hoped that in future years the continuity of the Recorder's Office will be assured and that provision will be made for sending a reply card twice every year to each graduate. In this way only can the accuracy of the Alumni Directory become approximately perfect.

LOUIS P. LÖCHNER, '09,
Alumni Recorder.
